Predictable Results
Increased practice revenue

The Program will be held at:
Expertec Lab
200 N. Wayne Road
Westland, MI 48185
To Register
Call Lisa or Liz at Expertec
888-875-6011

As the US population older than 50 grows, so does the number of edentulous people. This is partly a result of the aging “baby boomers” as well as the fact that people are living much longer.

Many dentists choose not to see denture patients because of the perceived frustration involved in creating an esthetically attractive and fully functional denture.

In this all day program you will learn the simple system that allows you to offer your patients dentures that are predictable and profitable.

This course incorporates a live patient experience

Michael Pontack, CDT

Mike specializes in the fabrication of elite premium denture prosthetics. He is a graduate of the Geneva Dental Institute . As an educator he trained dentists and technicians on the art of dentures. As a dental technician his background in gnathological studies and focus on elite dentures earned him the reputation of providing clients and their patients esthetic rehabilitations that enhance their personalities and lifestyles.
