

*Improve your confidence in planning, presenting and performing larger and more complex cases*

## Part Two Anterior Esthetics Hands-On course

**Register early!  
Space is Limited**

*Dr. Lisa Powell is a graduate of University of Michigan School of Dentistry, and the Advanced Education in General Dentistry.*

*She lectures and teaches hands-on programs geared to the types of cases seen in an average dental practice. Not just full mouth reconstruction but simple changes that make a difference in patient's smiles.*

*In addition, Dr. Powell evaluates new products for dental manufacturers.*

*She has a successful practice in Saline, MI. Dr. Powell believes changing a patient's appearance can create new found confidence in all aspects of the patient's life.*

**Prepping under magnification is ideal. If you have loops please bring them with you**

#### When you leave the program you will have:

- More confidence to treatment plan and restore complex cases
- The knowledge to combine different preps and porcelain materials and the understanding of how to bond and cement the different restorations
- Step by step guidelines and checklists to help you organize
- Treatment planned complex cases from start to finish
- Developed a critical eye for excellence in aesthetics

*Treatment plan your own patient. Bring models for evaluation.*

*Each dentist will benefit from personal instruction for their own case and will help diagnose and review other cases.*

Expertec Dental has been designated an approved program provider by the Michigan constituent of the Academy of General Dentistry #217829

## Overview:

This program will cover complete examination and diagnosis of a patient utilizing several diagnostic recording and evaluation tools, including Smile Analysis for correct assessment and diagnosis.

You will learn phased sequencing and planning of the comprehensive case. Understand advanced preparation techniques for Smile Design Dentistry. Plan typical Smile Makeover cases: crowding and diastema cases. Learn correct preparation design, occlusal planning and soft tissue management of Advanced Cases.

## Hands – On:

- Treatment Planning, Smile Analysis, and Smile Design
- Using photos, x-rays, models
- Golden proportion guidelines – size, length, shape, # of teeth
- Make putty forms and molds for prepping and making temporaries
- Create the ultimate temporaries to “WOW” the patient and to act as a “blueprint for success” (Advanced techniques).
- Esthetic wax-up model, and prep design
- Prep on actual model of crowded, rotated teeth that you treatment planned
- Actual cases that involves all porcelain esthetic crowns, veneers, and zirconia restorations (reduction, margins, and more) on the same case
- Tissue retraction techniques, Impressions, Temporaries
- Discuss bonding and cementation techniques
