

Sinfony™ Indirect is a microhybrid composite designed the build and layer just like porcelain.

Sinfony™ Indirect has been proven in tests to be as strong or stronger than other brands and to possess inherent advantages in flexibility, impact strength and color stability. Sinfony composite is the clear choice for composites when concerned with performance and esthetics.

Indications:

- Inlays/Onlays (all teeth)
- Crowns (all teeth through 1st molar)
- Bridges (3-unit, all teeth through 2nd bicuspid)
- Veneers

Sinfony™ composite gives a virtuoso performance.

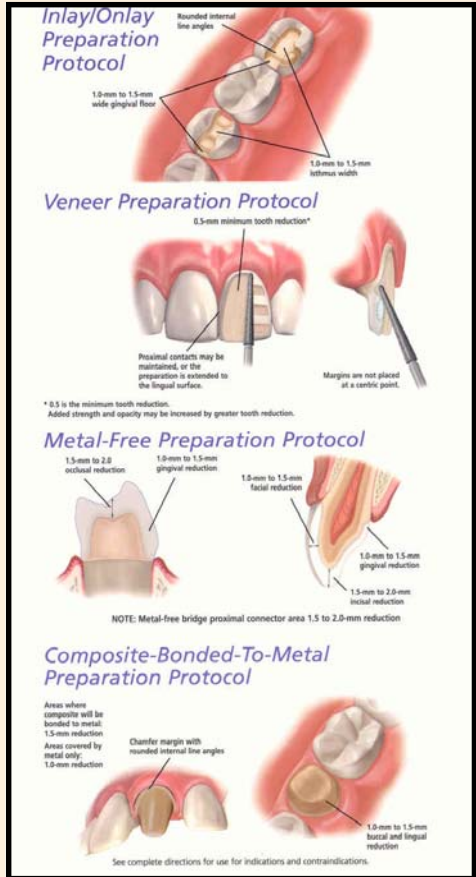

- Excellent esthetics and translucency
- Superior wear characteristics
- Ease of finishing and polishing
- Plaque and stain resistant
- Handles like porcelain

Before

After

Use 3M ESPE RelyX™ Unicem Self Adhesive
