

## The First Choice in Metal Free Removable Esthetics

Durable performance, excellent retention and tooth and tissue colors for esthetics...Thermoflex is the metal free material or removable restorations with ideal flexibility for multiple applications. Can use in combination with a metal partial or by itself.

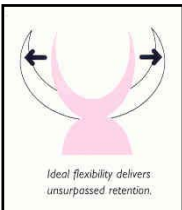

- Ideal flexibility - better function
- More colors - greater flexibility
- Monomer - free
- Hypoallergenic/biocompatible
- Hydrophobic - won't absorb water or saliva
- Lightweight - improved comfort
- Wear Resistant - durability
- Low thermal conductance
- Plaque resistant

16 tooth colors and 3 tissue colors.

### More Natural Esthetics

You choose metal-free removable restorations to enhance esthetics—16 tooth colors and 3 tissue colors give you the ability to match clasps and bridges for long term patient satisfaction.

Ideal flexibility delivers unsurpassed retention.

### More Flex for Better Function

Thermoflex is so flexible, it can flex around the largest tooth, then use its superior elastic memory to cling deeper into the undercut for a rigid, functional hold.
