

**Expertec Dental Lab has Convenient,
No-Charge pick ups and Delivery Service
888-875-6011**

Our normal business hours are 8 am to 5 pm. If you call after lab hours you can leave the message on our answering machine.

Local Michigan Service:

We have our own drivers for local pick up and delivery. Your driver will ask you for specific instructions on your pick-ups, as well as, explain the approximate time for pick up and delivery at your office.

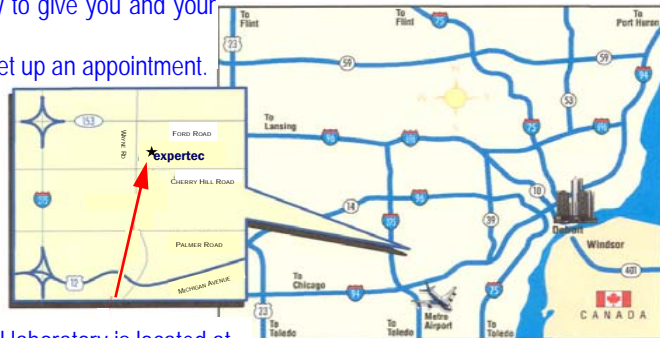

It will be beneficial to:

- Have an area that is clearly designated for pick-up and delivery.
- Have bags clearly marked as a pick up (There can be confusion if a delivery was not moved and the driver may think it is a pick up).

Call if you have any questions on scheduling or pick ups call *Christina Allen*, our Customer Service and Scheduling Manager or you may speak with *Jennifer* They'll be happy to help.

Pick Up and Delivery

We invite you to visit the laboratory. We are very proud of our facility & would be happy to give you and your staff a tour. Just call us to set up an appointment.

Expertec Dental laboratory is located at 200 N. Wayne Rd. One block north of Cherry Hill Road in Westland. The lab is on the east side of Wayne Road across from Burger King.

What to look for in a laboratory....

A great dentist deserves a great dental laboratory.

The right match makes all the difference.

Communication: Your lab should be available for consultation on a case.

Technical Expertise: You should be able to count on your lab to offer the latest proven techniques and products.

Education: Your lab should offer lectures and programs to help enhance your practice and knowledge. Education does not stop after graduation. Your lab should require their technicians to keep up on the latest techniques and technologies.

Size: Small enough to care but large enough to service you.

Value Added: You hear about it all the time. But what is it?...and is your laboratory making the necessary investments in technology and training to increase the Value of their products to you?

What to look for in a laboratory.....

Communication: The owners of the lab, George Alioto, CDT and Larry Kunze CDT, FNBC, as well as, the department managers are available for case consultation.

Technology: Expertec is a member of Terec (Technical Research Consortium) an international organization that is at the forefront of emerging technology.

Education: At Expertec we believe in Education for ourselves and for our clients. We offer lectures throughout the year, study group meetings, and lunch and learn programs in your office. We provide hands-on programs with live patients for that advanced learning experience.

Size: We are small enough to care and yet large enough to provide you with the services you need from the latest technologies to more highly skilled dental technicians.

Value Added: Starting with model & die...we utilize computerized vacuum stone mixer, Smart Box stone and liquid dispenser, dry model trimmers and articulation systems that are accurate and consistent. Each Expertec crown is fabricated by a thoroughly trained, tested and skilled technician. It is waxed, finished and quality controlled under high-power magnification to ensure perfection on the die. We utilize state-of-the-art vacuum casting technology, which produces pure castings that enable a superior bond to porcelain. And we include all this at no extra charge. More value "built in" ... included not extra.....that's Value Added, and you get it everyday from Expertec.
