

Have You Tried Our 3D Printed Bitesplints???

Expertec now offers digitally printed bitesplints in two materials, hard and soft. Both materials are resistant to fractures, abrasion, and staining. The materials have the strength needed to protect your patient's teeth against bruxism. For more information contact Steve at 888-875-6011.

Happy 23rd Birthday Expertec

This month we celebrate 23 years of being a lab for every dentist

- Providing quality dental products, services and award winning smiles
- Privately owned from the beginning
- A Michigan based company with no overseas outsourcing
- Offering the latest technology in removables, implants and metal-free crowns and bridges
